

Certified by ISO9001 International Quality Control System

RAMP-200 Series Off-Ramp 12 VDC Warning Lamps

FEATURES

- Automatic turn-on/turn-off during night/day time
- Built-in flasher
- High-efficiency solar panel charge
- Long lasting battery life
- Continuous operation for 25/30 days during cloudy/rainy days
- Low power consumption & long-life LEDs
- MIL-STD-883 mechanical vibration / MIL-STD-810F moisture resistance
- Aesthetic pole design complies with color requirements of warning devices
- Wide warning applications for any obstruction locations

Model Number	Lamp Size(mm)	Lamp Color(nm)	Lamp Voltage	Lamp Power(w)	Power(w) Typical	Solar Panel(V/W)	Battery (V/Ah)	Operation Temp.
RAMP-200SYDC	200	Yellow (592)	12VDC	4.5	4.5	12 / 3	12 / 17	-40°F - +165°F
RAMP-200DYDC	200/200	Yellow (592)	12VDC	4.5/4.5	4.5	12 / 3	12 / 17	-40°F - +165°F

All characteristics of LED modules, including chromaticity, moisture and vibration resistance, electronic noise, etc., are in compliance with the standards specified in ITE LED Vehicle Signal Modules.
